

# Sterling unveils new solution to keep commercial aircraft flying smoothly

## Introducing Sterling's logistics hub at Washington Dulles International Airport (IAD)

Fast-tracking the delivery of your urgent aircraft on ground (AOG) parts with innovative logistics solutions has been Sterling's focus for more than 40 years. We're supporting this effort by launching logistics service hubs. This includes our newest hub at Washington Dulles International Airport (IAD), which will serve one of the world's largest original equipment manufacturers (OEMs).

## Quicker and more reliable access to essential components

Sterling's IAD hub leverages the airport's strategic advantage for seamless global access and same-day delivery across the US. The service will transport parts from the OEM to Dulles as well as Ronald Reagan Washington National Airport (DCA) and Baltimore/Washington International Thurgood Marshall Airport (BWI).

## Delivering the security and speed you expect

The IAD logistics hub is managed by a team of seasoned aerospace logistics experts. They work closely with dedicated Sterling drivers and experienced logistics service partners to efficiently move AOG parts to these busy airports, delivering:

- Unmatched access to aircraft parts, enabling commercial operators to minimize AOG situations
- 24/7 shuttle services from the global OEM's local facility to IAD, DCA and BWI airports
- Enhanced security with comprehensive chain of custody protocols
- Faster receipt of critical parts, minimizing costs associated with AOG situations

## Smart technology and proactive monitoring by Sterling logistics specialists

The IAD logistics hub also offers access to our latest technology—the Sterling Smart Label. This 'peel and ship' label features a built-in tracking device that uses GPS, cellular, and Wi-Fi to monitor location and shipment condition in real time. Sterling logistics specialists use this data and other inputs to actively identify and resolve potential disruptions.

## Ongoing service enhancements for operational efficiency

As part of Sterling's commitment to increasing operational proficiency, we are always working on collaborative opportunities with strategic airline partners to expand our suite of air capabilities and flight options. The goal is to continuously build on our services to meet—and exceed—your expectations.

### Fastest routes for expedited OEM parts delivery from IAD, DCA, and BWI to your global locations

Local OEM facility

Direct route

- Washington Dulles International Airport (IAD)
- Ronald Reagan Washington National Airport (DCA)
- Baltimore/Washington International Thurgood Marshall Airport (BWI)
