Sterling Airside Logistics: Expedited delivery of AOG parts at Singapore Changi Airport

Get grounded aircraft back in the air—fast

Introducing Sterling's newest aircraft on ground (AOG) service, designed to minimise downtime and maximise operational efficiency.

A 24/7 first- and last-mile solution

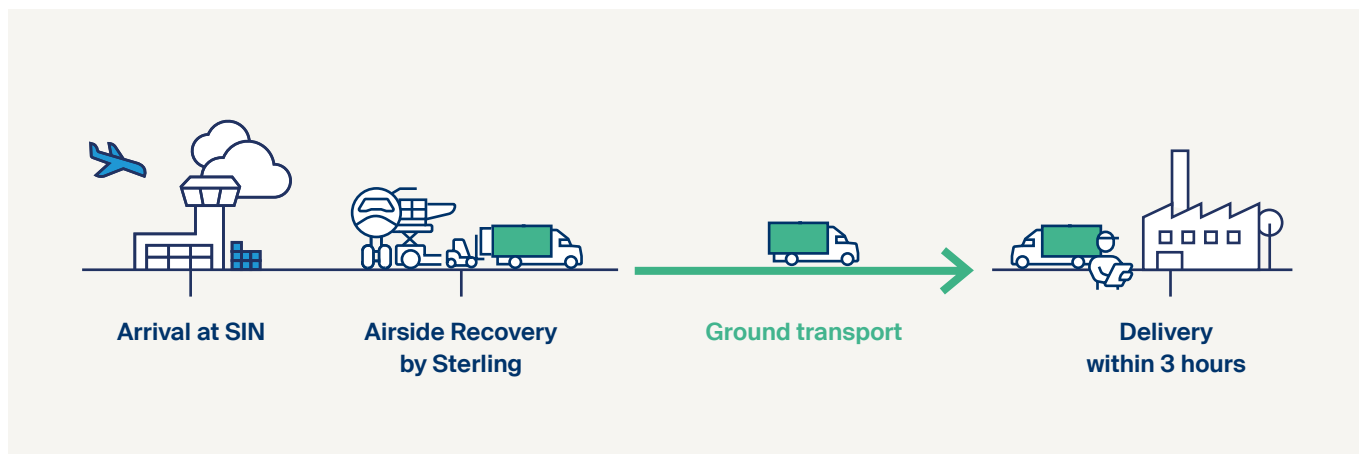

Serving Singapore Changi Airport (SIN), Sterling Airside Logistics provides specialised handling of AOG parts from beginning to end.

Pickup and delivery

- Direct transport to aircraft cargo holds
- Shorter lock-out times for urgent exports

Arrival and recovery

- Airside recovery at SIN
- Delivery within three hours of touchdown

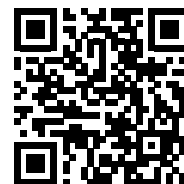

Supporting your AOG needs for 40+ years

At Sterling, we understand that revenue lost due to AOG situations isn't measured by the day; it's measured by the hour. That's why some of the world's leading Maintenance, Repair and Overhaul (MROs), Original Equipment Manufacturers (OEMs) and commercial and corporate aviation operators rely on Sterling to keep supply chains moving with:

- 24/7 access to specially trained aviation logistics experts
- Customised logistics planning with the safest, most efficient route
- Guidance on import and export regulations, customs compliance, documentation and more

Want to learn more? Reach out today to find out how Sterling Airside Logistics gets your critical parts to you as quickly as possible—no matter where in the world they need to be.
